## U.N. PACKAGING NOTIFICATION ON CONTAINERS FOR HAZARDOUS SOLIDS ONLY

We appreciate your business and must keep you informed of the following.

As you know, the liability rests upon the filler of containers to make certain that the U.N. approval is met. To meet U.N. standards, this package must be properly closed for shipment. Closing instructions have been included in Section A below. Failure to follow the closure instructions or substitutions of the package components other than those identified in the following paragraph will render this U.N. Certification invalid.

### Packaging Components:

1. Appropriately marked U.N. certified M & M Industries container
2. Solid - matching cover size with trigger attached

### Section A:

According to the U.S. Department of Transportation Title 49CFR, Parts 100-199, it requires that manufactures of U.N. approved packages notify their customers regarding all requirements that the package must go through to make certain it makes U.N. approval.

Specifically, the following items maintain this notification:

1. Life Latch® containers are certified for U.N. package performance oriented packaging and is marked with the appropriate U.N. markings on the bottom of the container.
2. The Life Latch® pail must always be used with the Life Latch® lid to meet U.N. approval.
3. For solid/dry: To close the container, seat cover onto top of container. Torque cover so threaded contact is a full 180 degree turn for non-gasketed lids and 90 degree turn for gasketed lid.
4. Appropriate markings must be maintained so that the product filled inside the Life Latch® pail matches the intended hazardous commodity ranking which U.N. certifies for that package. The U.N. markings are defined in Section B.
